## **NEW! 165 DGE Back-of-Cab On-Board CNG Fuel System**

Introducing Mainstay's 2016 back-of-cab on-board CNG fuel storage and delivery system. Utilizing Type IV cylinders and related technology, the systems have wide range capabilities, allow for faster, more efficient fills and incorporate robust safety features.

- Stored capacity: 165 DGE
- Range in miles from 650- 800 miles
- Frame design and tank array offers the optimum balance of weight and durability
- Narrow profile reduces required rail space
- Can also be configured with any of our side mount CNG options for additional capacity range
- Optional features include:
  - Aerodynamic trailing edge BOC extenders
  - Customized exterior paint

*All units are tested and serialized for warranty, tracking, and servicing functionality.*
